Superlight Aviator 150N Manual Aircrew Lifejacket

Approval: ISO 12402-3	Flotation: Inflatable	Buoyancy: 150N
Chambers: Single	Harness: n/a	Inflator: UML-5

This manual inflating lifejacket is designed for specialist use by private pilots and as an aircrew lifejacket. Fitted with a manual only arming mechanism, it makes escape from a ditched aircraft possible before the jacket is inflated.

This jacket is suitable for offshore use. Designed to be comfortable to wear, it is both lightweight and compact allowing good freedom of movement.

With 150 Newton's of buoyancy this lifejacket conforms to European Regulation 2016/425 Personal Protective Equipment and meets Standards ISO 12402-3 and 12402-6. Officially classed as a lifejacket because it turns the wearer into the upright position once in the water. This lifejacket is recommended for use by pilots and aircrew only.
